Summary

I'm self-taught Web Developer and I have no work experience. I'd like to apply for internship.

Experience

- I learned HTML, CSS and Javascript about 3 months ago. And I learned how to develop mobile responsive web apps. I created some cool projects on my own. <https://otabek-kholmirzaev.github.io/portfolio/> this is my portfolio website and you can see my projects. After learning these core web development concepts, I started to learn one of the most popular Javascript library React.js. Right now I'm focusing on React and I'm learning how to build complex web applications. I created also two web apps using React. These are Task Tracker app and E-Commerce Shopping cart. You can see them in my portfolio website.

Skills

- HTML
- CSS
- JavaScript
- React.js
